LiveATC.Net

Bringing Live ATC communications to the Net around the globe!

LiveATC.net is the first site to stream over 130 live Air Traffic Control audio "feeds" from around the globe, providing many listeners an enjoyable live aviation radio listening experience, as well as instant audio archive retrieval. Visit today to see if your home airport is being streamed!

"LiveATC.net lets you to listen to live ATC transmissions from almost anywhere in the world."

-Alex Beam,
The Boston Globe

Your airport could appear on the list!
Here's all you need:

- ✓ A PC running Windows 98/2000/XP, Linux, *BSD, or Mac OS X
- ✓ An always-on high-speed Internet connection
  - ○ Only requires 16kbps, which will not affect your connection
  - ○ Streaming does not work well over dialup connections
- ✓ A receiver (preferably a scanner) capable of receiving airband transmissions (118-136 MHz)
- ✓ Audio cable to connect scanner/receiver to the input of your PC's sound card (usually 1/8" to 1/8" stereo audio cable)
- ✓ Free software that we provide and help you set up

Volunteers around the world provide live air traffic control reception - why don't you join in? LiveATC.net is always looking for new volunteer feeders!
