LiveATC.net

Live air traffic, from their headsets to you.

LiveATC.net is the world's premier site to listen and improve your air traffic control transmissions or just be entertained by controller-to-pilot chatter from the convenience of any computer and many smart phones! Streaming over 200 live ATC audio feeds from around the world, LiveATC.net serves as an excellent resource for pilots, student pilots, flight instructors, aviation enthusiasts, and others who wish to monitor ATC transmissions for education and enjoyment. Automatically archived recordings allow users to play back ATC transmissions for up to 30 days.

"LiveATC.net lets you to listen to live ATC transmissions from almost anywhere in the world."

Alex Beam,
The Boston Globe

Interested in volunteering a live feed? Visit www.liveatc.net for more information.
